

ARCHITECTURAL TRIM

THE FINISHING TOUCH

When it comes to putting the finishing touches on your Creative Mines stone and masonry veneer project, our **Architectural Trim** is the perfect solution. We take great pride in the craftsmanship of each piece, paying close attention to the rich and historic masonry tradition that has inspired our work. Choose from two distinct textures; the Flamed texture is perfect for those looking to achieve a more refined appearance, while our Dressed texture is ideal for those who want to highlight the traditional flagstone surface and split face edges of classic masonry.

SELECT YOUR TEXTURE

DRESSED

Dressed features a classic flagstone surface texture with snapped edges for a more rugged appearance on the edge of the stone.

FLAMED

Flamed achieves a modern and refined texture through a torching technique creating a consistent texture on the surface and edges.

HIGH PERFORMANCE DURABILITY

Creative Mines is the only stone and masonry veneer using pozzolan - a natural additive found in icons like the Colosseum for unrivaled durability.

- Made of lightweight concrete mix design
- Easier to cut than accessories made of heavyweight mix designs that use gravel or sand mixes
- User friendly to carry and transport
- High freeze-thaw durability
- Integrated color with no color rub-off

Nature is unpredictable and Creative Mines Architectural Trim stones excel in all seasons. Our industry-leading freeze-thaw durability with 0% degradation, 4800 PSI compressive strength and superior resistance to moisture intrusion and unsightly efflorescence is unmatched.

Using a combination of post-industrial and natural materials, Creative Mines Architectural Trim stones are handcrafted by skilled artisans with authentic stone color palettes for unlimited masonry design options. Each stone is made with proprietary molding technologies to ensure 90-degree angles, straight edges, and distinct masonry textures.
